Autodesk products, including AutoCAD Torrent Download, have been awarded several awards for their engineering excellence. In 2013 Autodesk was recognized as "Engineering Organization of the Year" by Engineering News-Record. Contents show] AutoCAD 2009 is a client-server, vector-based 3D CAD program. It is distributed on both CDs and DVDs and is a great choice for engineering firms of any size. It can draw and edit all types of 2D and 3D objects (2D drawing is known as the project canvas, and 3D drawing is known as the drawing window) using layer technology, which means the objects can be easily reorganized, re-drawn, and worked on. AutoCAD also includes dimensioning and annotation tools that make it easy to interact with other 2D and 3D objects. It can help you create an attractive and professional-looking drawing or model for architects, engineers, and contractors, and it has a built-in database that lets you store drawing and data information. AutoCAD's drawing window automatically saves your drawing in the database, so you don't have to worry about wasting time writing down revision notes. Benefits of AutoCAD AutoCAD is available for a wide variety of platforms. Creates 2D and 3D drawings, and projects and projectsets. Create a design for any project. Supports 2D and 3D drawing technology, including layers. 2D and 3D CAD drawing tools. CAD expertise is not needed to operate AutoCAD. Drawing history and revision notes. The software can connect to a database, for ease of use. Drawing, annotation, and dimensioning tools. Support for various file formats, including DWG and DGN. Supports various construction types. Architecture and engineering. Hover highlighting for drawing features. Creating 3D models and projecting views. Reads DWG and DXF files. PC or Windows versions. XREF XREF (as in "cross-reference") is a popular feature in AutoCAD Serial Key LT that provides a "tip-of-the-fingers" search mechanism. XREF allows a user to type a partial block, such as for example "ea" or "e", and find objects called "ea" or "e", all in the current drawing. What's New In?

Automatically apply annotation styles to drawings from LiveDocs, and import comments from LiveDocs in any drawing. Support for simultaneous import of component drawings from multiple.dwg files. Quickly navigate to detailed views within a drawing, and you can now move views back and forth between all drawings. Improved error messages and code execution messages. Hovering and double-clicking on text and annotations triggers a more visual cue that a feature is selected. Subselection of groups and layers in the tool palette improves the efficiency of complex drawing tasks. Draw more rapidly with native-app-like performance. Smart Guides now update with the path and shape you work with and work in the background so you don't have to wait for the path to complete. Enhanced AutoCAD Scripting: New script languages for VBA, Python, and Visual Basic: Support for Python 3.7 is now available. New functions and parameter names in VBA help you more easily adapt your script to the requirements of AutoCAD. Visual Basic now fully supports multithreaded scripting. Create more efficient scripts by using a variety of built-in VBA classes and structs. New.NET scripting: Automatically convert text to editable text and save the conversion. Support for floating point and integer values, and variable names no longer must be capitalized. Support for Unicode text. Support for MDX 2012 is now available. New HLA scripting for AutoCAD: Animation: Support for spatial animation and spatially interpolated transitions. XRef from DWF to DWG: Create a copy of DWG or DXF layers with appropriate properties, and specify them to be included in a new DWF document. Add a layer of a new DWF document to a DWF document. Optimized Windows Interface: Enhanced AutoCAD UI: The AutoCAD Ribbon now supports Windows 8-style menu and Windows-style context menus. Experience the full quality of the Windows Aero desktop with a new, improved user interface. Improved user experience on Windows RT. Video: The video recording function has been significantly enhanced. Capturing video from inside the drawing has been made much easier. You can now import an MP4
