## Recovery Data Recovery Wizard Pro

Recovery Data Recovery Wizard Pro is a powerful data recovery solution that has the ability to recover deleted, lost, formatted, and corrupt documents. It can recover all types of files from your computer, digital camera, MP3 player, mobile phone, or tablet. 1. Your file wasn't deleted, it was moved to a different folder. For example, sometimes, we accidentally delete a file which is not in the place where we have saved it to. For example, we may have saved a video file in our desktop, and then deleting that file from desktop folder will help us free up valuable space. But the video file has been moved to the Pictures folder. When we try to download that video from our PC, it will take a long time to load because that video file has to be scanned from the Pictures folder to our local hard drive. So, Data Recovery Wizard can help you deal with such situations. It can scan and recover the moved files so you can have them back on your PC or any other devices again. 2. Your file was deleted from the computer. Data Recovery Wizard can detect deleted files, and recover them to its original location. After recovering, you can access them by simply restarting your PC. You can restore a file directly from recovery box, or preview it before restoring. 3. Your file was formatted. Sometimes, a file that we want to keep is being formatted without our permission. We can't read or edit the content of that file and we also can't save it again. Data Recovery Wizard can detect such situation and help you recover such formatted files. 4. Your files were lost from your computer due to a virus. Whether it's a virus attack or a format, you can use Data Recovery Wizard to see all your files which are lost. After that, you can be able to restore them to their original location. 5. Your files were lost from your computer due to a program. Sometimes, we install a program which is not compatible with our PC. It can delete your files and make your whole computer unusable. Data Recovery Wizard can detect those situations and find back your lost files. 6. Your files were lost from your hard drive. Data Recovery Wizard can detect all your files and recover them to its original location. You can restore a file directly from recovery box, or preview it before restoring. 7. Your files were lost due to accidental format. Sometimes, we accidentally format our drives or accidentally format a floppy disk.
