Manage your clipboard content in your own personal way. Whether you're a student or a businessperson, the ability to immediately copy and paste is a useful tool that you can use in different ways. With the included, customizable hotkeys and all-in-one design, it doesn't get any easier or quicker than this. Integrated into the OS Add content to the system clipboard with one easy step. No need to go to a different application, just use the default copy-and-paste function, and pick the item from the full list. Use pre-defined settings or create your own for personalized use. You'll be able to edit the settings and easily copy or copy one element to another and paste it wherever you want with just one click. Edit individual clipboard items Whether you're a student or a businessperson, you can easily edit items in the clipboard. Arrange them in different categories so you can find your stuff at a glance. Some of them store images or videos for their respective category. Configure your own hotkeys You can add your own hotkeys for any kind of item in the clipboard. Create a custom shortcut, assign a letter or use an existing default one, and edit the settings at any time. The assigned hotkey is used to simply select the item you want to place in a category. Editing settings Customize basic settings for the clipboard. Choose how many categories to create, how many items to keep in each one, or even define certain functions to automatically rearrange the items. Use the pre-defined settings or create a customized set just for you. Create your own items Add photos, text, sounds and even images to the system clipboard. The integrated New item window lets you quickly bring a new item to the clipboard so you can use it anywhere. Watch Windows and your clipboard simultaneously In the upper left corner of the application's window, you can see the system status and the current clipboard content. You can also see the images and other content for the currently selected entry, since the system images window takes over. Check the clipboard, check the clipboard The integrated clipboard viewer displays current and previous clipboard items. You can see a preview of what you're going to copy and paste. This is especially useful for larger items. You can simply select what you want to copy, press the hotkey assigned to the menu and just watch the system clipboard. Unique design and small file size You can copy text, images, sounds and videos from
