Applications are now an integrated part of AutoCAD and other AutoCAD related applications. AutoLISP is a programming language that is embedded in AutoCAD LT. It is also used to create custom objects and features, but it is used most frequently to extend AutoCAD functionality. AutoLISP is most often used to create custom dialog boxes and other user interface components, but it is also used for programming macros, as well as for functions such as validation and database integration. File formats and interoperability AutoCAD, together with the software AutoCAD LT and AutoCAD Architecture, supports most of the DWG, DXF and PDF file formats. As of 2017, the maximum file size of DWG and DXF files is 64GB. AutoCAD Architecture can import, display, plot and export to PDF, DXF, DWG, JPEG, PNG, TIFF and VRML. Additionally, the software is known to handle model formats such as FreeCAD (geometric modeling) and OpenSCAD (free 3D modeling and plotting). AutoCAD LT has its own file format.dxflt. AutoCAD LT is versioned; the files can be converted between versions if the same application, version and version number are used. Only one instance of AutoCAD LT is supported for a specific computer. The DWG and DXF formats support the following predefined drawing objects: Lines Circles Rectangles Arcs Polygons Bézier curves Splines Text Text objects Polyline Polygon a1d647c40b
