But the way that we expect that such things may get changed so frequently.Q: How to generate a QR-Code with at least one specific number I use the QR-Code-Generator from the Android-Samples. It's possible to use the method "setExtra" to insert a string value in the QR Code. But what if I want to generate a QR Code with a number at least one, which is not determined by the value of a variable? For example, I want to generate a QR Code with a fixed number at the position 2, and when I scan the QR Code, the number will appear. Do you know how this can be done? A: There are just few possibilities : use a transformation matrix to transform the number to a string in a format similar to the one in the answer of hsjap. get the matrix from the method setMatrix in the QR Code generator scan the number directly with the scanner Q: Trying to find closed form of a simpler expression I am having trouble finding a closed form for this expression. $$\int_{0}^{1}\frac{\ln(\ln x)}{x(1-x)}\mathrm{d}x$$ A: You need to use an identity: $$\ln\left(\frac{1}{1-x}\right) = -\ln x - \sum_{n\ge 1} x^n$$ Then the integral is just $$\int
