User reviews and ratings for Ping Manager: 4.1.23 (2,823). As the first website that offers free download for the latest version.Q: How can you make an if statement within a ng-click? I have an input where the user can input a time in the format hh:mi:ss. It's a converter (somewhat like Google's). I am using Angular in which I have created a function for the ng-click as well. The user can also modify the time input, as a temp variable, which will be thrown out after I calculate the difference between the initial time and the modified time. If the time the user enters is less than 10 minutes, I want to show a messagebox that says something to the effect of "Please enter a time in the format hh:mi:ss." I have tried to set an if statement within my function to take care of this. Can someone help me set up the correct statement? Here is my code: HTML:
